

Website with dynamic text

Task

Create a pixel perfect representation of the mock on page 2.

Specifications

- Preferably, the site will be built using React.
- The site should be responsive.
- The blue section should be 100vh and stick to the top of the window when the user reaches that section.
- The mock purposely has empty grey sections on top and bottom to test the scroll locking functionality.
- Once the blue section is stuck in place, the next few scroll events should replace the current header with the phrases found below. Once the user has gone through all the phrases, the whole section can continue scrolling as normal.

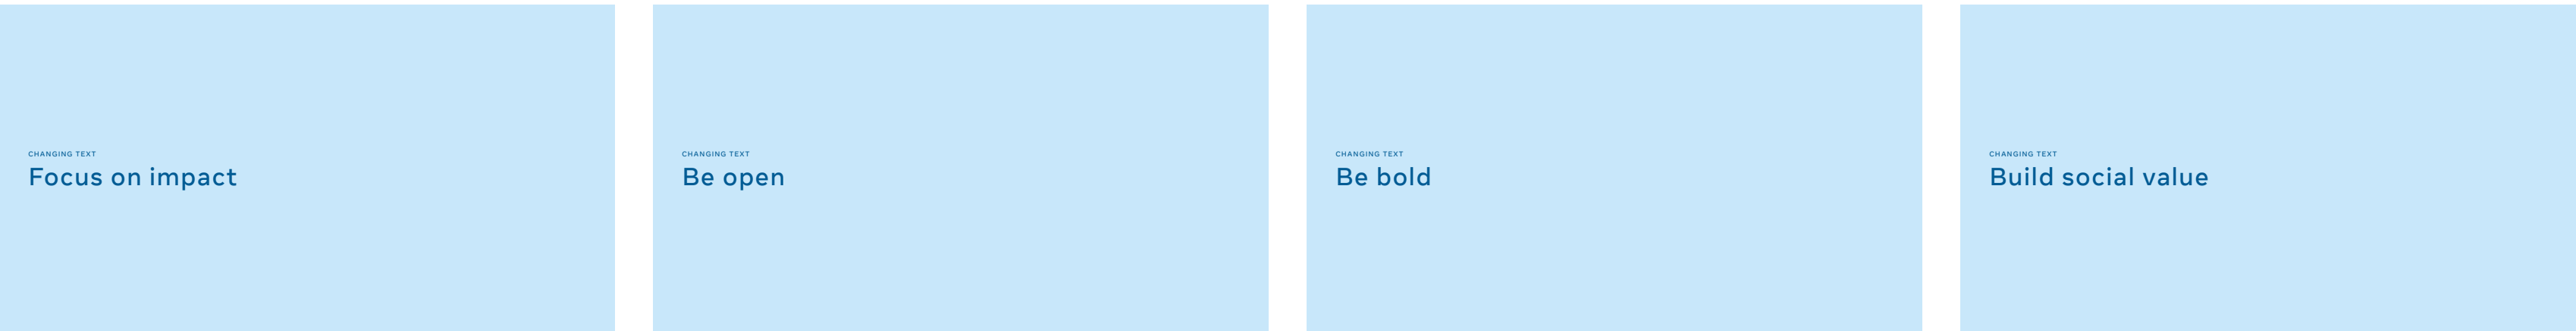

“Focus on impact”

“Be open”

“Be bold”

“Build social value”

- Below are the possible states of the blue section:

Timeline

You will have 24 hours to complete this task

Estimated time to complete: 2 hours

CHANGING TEXT

Focus on impact
